DANIEL KEME

FULL-STACK SOFTWARE ENGINEER

Abuja, Nigeria | +234 7039320583 | dnielkeme@gmail.com | linkedin.com/daniel-keme | github.com/xeidan

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience architecting scalable web applications, real-time fintech engines, and Web3 infrastructure. Specialized in **TypeScript, Next.js, Node.js, PostgreSQL, and Solidity**, with a proven track record of leading end-to-end product development from architectural design to cloud deployment on Vercel and Railway.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Solidity, HTML5, CSS3
Frontend: React, Next.js, Tailwind CSS, Lightweight Charts, Lucide React
Backend: Node.js, Express.js, REST APIs, Supabase Auth, Supabase RPC
Databases: PostgreSQL, Supabase
Blockchain & Web3: Solidity, Foundry, OpenZeppelin, Wagmi, Viem, Reown AppKit, Base
Integrations & Real-Time Systems: Binance REST API, WebSockets, Resend, SendGrid
Testing & Development Tools: Postman, Vitest, ESLint, TypeScript Compiler, Git, GitHub, npm, pnpm
Cloud & Deployment: Vercel, Railway, Heroku

PROFESSIONAL EXPERIENCE

Metacap Technology — Founder & Full-Stack Developer

2023–Present

- Lead the technical development of multiple digital products, including REBOX, EarnRave and DNGT, covering architecture, frontend and backend implementation, database design and deployment.
- Design and implement REBOX's device identification engine, using catalogue-based matching and database queries to identify device models and variants, with confidence scoring.
- Develop EarnRave's trading analytics infrastructure, including trade journaling, performance tracking, strategy analysis, risk assessment and automated trading performance reporting.
- Implement real-time market data integration for EarnRave using Binance REST APIs, WebSockets and interactive charting tools.
- Develop DNGT's blockchain infrastructure, including Solidity smart contracts, token-related functionality and wallet connectivity using Foundry, OpenZeppelin, Wagmi and Viem.

Mobo Mart Ltd — Software Engineer

2023

- Optimized core web application UI using JavaScript and CSS, reducing initial page load times and improving mobile responsiveness.
- Resolved 40+ critical application bugs across frontend and backend API endpoints, increasing platform stability during high-traffic updates.
- Collaborated with team members to implement new features and improve existing systems.
- Tested application functionality and supported ongoing maintenance and updates.

SELECTED PROJECTS

REBOX — Device Intelligence & Marketplace

Device-focused marketplace featuring catalog-backed identification, automated model detection, and confidence scoring verification.

Technologies: Next.js, TypeScript, React, Tailwind CSS, Supabase and PostgreSQL.

EarnRave — Trading Journal & Performance Analytics Platform

Performance evaluation engine helping traders record, review, and analyze trading activity with actionable risk insights and real-time market telemetry.

Technologies: JavaScript, Node.js, Express.js, PostgreSQL, Binance APIs, WebSockets and Lightweight Charts.

DNGT — Blockchain / Web3 Project

Web3 application featuring custom ERC-standard smart contracts, wallet connectivity, and decentralized state management.

Technologies: Next.js, TypeScript, Solidity, Foundry, OpenZeppelin, Supabase, Wagmi, Viem, Reown AppKit, Base

EDUCATION & CERTIFICATIONS

Bachelor of Science (B.Sc.) in Computer Science
Imo State University (IMSU), Owerri, Imo State, Nigeria 2017 – 2021
